Russian Front Collapses

News reports from the eastern front were very good this past month. Several gapping holes were reported by both Army Group North and Army Group South this past month. Russian units are reported to be thrown at our troops with little training and equipment.

Entire divisions were surrendering to advancing German units. They tell us of abuses by superior officers who spends most of their time drinking Vodka then fighting.

German Panzers in Russia

Denmark Explained

This past month Germany was forced to invade Denmark. A serious threat was discovered when a letter was intercepted by German Intelligence to Denmark's leadership from Churchill. In that letter Churchill wanted to use Denmark like it is currently using Portugal as a base for invasion against Germany. We cannot allow that to happen.

Now that the country is secure a security force will remain to insure the security of the Third Reich.

End Run in Spain

German infantry made a fighting withdraw action against elements of the British army in Spain to allow other units to out flank them. A strong drive is under way to the ports that supply those units trapped in the interior of Spain.

Admiral Raeder addresses US Merchant Marines

The US continues to violate the Neutrality act by giving aid and war materials to Britain who initiated hostilities with Germany in September of 1939 on the high seas. Britain like its former ally France started hostile actions with Germany by invading Germany not the other way round despite what you may hear in the “free press”

This month a convoy heading to Russia was soundly destroyed, Russia I may remind you invaded Romania without cause and is currently threatening Finland with numerous border instances and over flights.

To Churchill you are but numbers on a page in an attempt to get the USA people into war, a war they DO NOT WANT! You are tools to the British people and its government. Do not allow yourselves to be used.

All this time free trade has been refused to the German people by FDR and threats have been made by him to Germany and her friends.

How many more lives will be lost in Churchill’s war? Do not allow yourselves to be used, do not allow yourselves to be tools of another.

More Merchants Sunk

Elements of the German navy have sunk over 1,000,000 tons of merchant shipping this year. The British seem to be almost at a loss as to how to stop them.

Hundreds of German submarines are reported to be at sea as well as several German High Seas warships.

One hopes with losses this severe, with the loss of her allies Britain may come to see that it isn’t the Global power it once was.

British merchant Sinking in the North Atlantic
